

# GOING GREEN SUSTAINABLE DEVELOPMENT IN NORTH AMERICA

We invite teachers of English and bilingual Science, Social Studies, and Geography classes to join us for a teacher symposium with experts in sustainable development in North American culture, literature, and society, and English language teaching. The program features short input talks and hands-on workshop sessions with ready-to-use and up-to-date teaching ideas and classroom materials. Contents are aligned with state curricula and Abitur exam topics for English in Lower Saxony and Hamburg.

The event is organized by the Institute of English Studies.

**FEB 20, 2019, 14.30-18h**
